

Dong Hoon Lee, Ph.D.

CONTACT INFORMATION	Korea Advanced Institute of Science and Technology (KAIST) 291 Daehak-ro, Yuseong-gu 34141 Daejeon, Republic of Korea	Phone: +82-010-9741-9959 Email: donghoonlee.ai@gmail.com donghoonlee@kaist.ac.kr Homepage: https://movinghoon.github.io
INTERESTS	I am interested in expanding the applicability of AI/ML models to resource-constrained settings. During my PhD, I have focused on (1) data efficiency—enabling learning with minimal labeled data through few-shot learning [C2, C6] and self-supervised learning [C3, C5]; and (2) computational efficiency—reducing inference and training costs through efficient transformer architectures [C4, C7]. Recently, I am extending these interests to generative models, exploring efficient inference and training of diffusion transformers [C7].	
EDUCATION	Ph.D., Kim Jaechul Graduate School of AI <i>Sep. 2022 - Feb. 2026</i> Advisor: Prof. Seunghoon Hong Korea Advanced Institute of Science and Technology, Daejeon, Republic of Korea Ph.D. Candidate, Electrical Engineering <i>Mar. 2018 – Sep. 2022</i> Advisor: Prof. Sae-Young Chung Korea Advanced Institute of Science and Technology, Daejeon, Republic of Korea M.S., Electrical Engineering <i>Feb. 2018</i> Korea Advanced Institute of Science and Technology, Daejeon, Republic of Korea B.S., Electrical Engineering <i>Feb. 2016</i> Korea Advanced Institute of Science and Technology, Daejeon, Republic of Korea Korea Science Academy, Busan, Republic of Korea <i>Feb. 2012</i>	
HONORS	Korea Government Fellowship <i>March 2012 to 2026</i> Qualcomm Innovation Fellowship, 2021 South Korea Finalist <i>2021</i> NeurIPS 2022 Scholar Award <i>2022</i>	
EXPERIENCE	Research Intern, LG AI Research, Seoul, Korea <i>April 2022 to October 2022</i>	
PUBLICATION	[C7] Dong Hoon Lee and Seunghoon Hong, “<i>Variable-Length Tokenization via Learnable Global Merging for Diffusion Transformers</i>”, in International Conference on Machine Learning (ICML) 2026. [C6] Kiet T Nguyen, Chanhuk Lee, Donggyun Kim, Dong Hoon Lee, Seunghoon Hong, “<i>Universal Few-shot Spatial Control for Diffusion Models</i>”, in Neural Information Processing Systems (NeurIPS), 2025. [C5] Whie Jung, Dong Hoon Lee, Seunghoon Hong, “<i>Disentangled Representation Learning via Modular Compositional Bias</i>”, in Neural Information Processing Systems (NeurIPS), 2025. [C4] Dong Hoon Lee and Seunghoon Hong, “<i>Learning to Merge Tokens via Decoupled Embedding for Efficient Vision Transformers</i>”, in Neural Information Processing Systems (NeurIPS), 2024.	

	[C3] Dong Hoon Lee, Sungik Choi, Hyunwoo Kim, and Sae-Young Chung, “<i>Unsupervised Visual Representation Learning via Mutual Information Regularized Assignment</i>”, in Neural Information Processing Systems (NeurIPS), 2022. [C2] Dong Hoon Lee and Sae-Young Chung, “<i>Unsupervised Embedding Adaptation via Early-Stage Feature Reconstruction for Few-Shot Classification</i>”, in International Conference on Machine Learning (ICML) 2021. [C1] Dong Hoon Lee and Song Chong, “<i>Learning based Utility Maximization for Multi-resource Management</i>”, International Conference on Future Internet Technologies (CFI) 2018.
PATENTS	[1] Song Chong, Yeongjin Kim, Jeongho Kwak, Dong Hoon Lee, “<i>Hybrid Content Caching Method and System</i>”, Nov. 2016.
PROGRAMMING LANGUAGES	Python (PyTorch/TensorFlow) GitHub: https://github.com/movinghoon
LANGUAGES	Korean (Native), English (Fluent)
PROJECT EXPERIENCE	Scalable representation construction by self-supervision without prior task experience National Research Foundation of Korea (NRF) <i>March 2021 to April 2022</i> Pre-prediction Modeling for autonomous network operation Ministry of Science, ICT and Future Planning <i>April 2017 to August 2018</i> Versatile Network System Architecture for Multi-dimensional Diversity Ministry of Science, ICT and Future Planning <i>April 2016 to November 2017</i>
ACADEMIC SERVICES	Conference reviewer - ICML (2022-2026), NeurIPS (2023-2026), ICLR (2025), CVPR (2023-2025), ICCV (2023-2024), ECCV (2024)
TEACHING EXPERIENCE	Teaching Assistant (KAIST) <i>Fall 2016 to Fall 2019</i> • EE807 Special Topics in EE: Mathematical Foundation of Reinforcement Learning • EE807 Special Topics in EE: Deep Reinforcement Learning and AlphaGo • EE405 Electronics Design Lab: Robocam/Network of Smart Things • EE210 Probability and Introductory Random Process
